Re: Extension

Dear Ms. Duncan,

Please accept this letter as notice that we would like to request an extension our construction project's sales tax exemption. We would like to request the extension from May 20, 2021 to May 20, 2022. Due to COVID-19 many of our planned projects have been delayed. Many of the contractor's were dealing with personal and employee Covid health issues. We are just starting to be able to get them underway.

If you have any questions, please do not hesitate to contact me. I would be happy to answer any of your questions or concerns.

Sincerely,

APPENDIX A – ATTACHMENT TO APPLICATION FOR FINANCIAL ASSISTANCE

Local General Contractor, Subcontractor, Trades and Labor Policy

It is the goal of the The Agency/**IDA** to maximize the use of local labor for each project that receives benefits from the Agency/**IDA**. This policy applies to general contractors, subcontractors, trade professionals, and their employees. The Agency/**IDA**'s Local Labor Area consists of the following New York State counties: Broome, Chemung, Chenango, Cortland, Delaware, Otsego, Schuyler, Steuben, Tioga and Tompkins.

Every applicant is obligated to provide written proof and data (see attached ... forms) to the Agency/**IDA** as to the physical location of all the contractors who worked on the project.

The Agency/**IDA** will review the data provided and determine, on a case-by-case basis and in a fully-transparent manner, whether the Applicant has substantially conformed to the policy.

An Applicant **will not be deficient** if the proposed project requires specifically skilled labor that is unavailable in the Local Labor Area.

An Applicant **will not be deficient** if the proposed project utilizes parts and supplies assembled elsewhere because no such assembly is available in the Local Labor Area.

An Applicant **will be held non-compliant** with the Labor Policy if it imports labor from outside the Local Labor Area when equal labor that is ready, willing, cost-competitive, etc. resides in the Local Labor Area.

The Agency /IDA may determine on a case-by-case basis to waive any portion of this policy for a project or a portion of a project where consideration of warranty issues, necessity of specialized skills, significant cost differentials between local and non-local services, documented lack of workers meeting the Local Labor Requirement or if other compelling circumstances exist.

In consideration of the extension of financial assistance by the Agency/**IDA** Kashou Enterprises Inc (the Applicant) understands the Local Labor Policy and agrees to submit either or both a Local Labor Utilization Report or a Non Local Labor Utilization Report at the time that construction ends on the project to the Agency.

The Applicant understands an Agency/**IDA** tax-exempt certificate is valid for one year from the effective date of the project inducement. If an Applicant wishes to request an extension, a letter must be sent 30 days prior to the end date to the Executive Director, on company letterhead, explaining the necessity for the extension.

The Applicant further understands any request for a waiver to this policy must be submitted in writing and approved by the Agency/**IDA** before a tax-exempt certificate is issued or extended.

The Applicant further understands that if the required forms are not submitted to the Agency/**IDA**, the Agency/**IDA** shall have the authority to immediately terminate any and all Financial Assistance being provided to the Project.

I agree to the conditions of this agreement and certify all information provided regarding the construction and employment activities for the Project as of 3/10/2021 (Submission date).

2. Fill in all blanks, using "none" or "not applicable" or "N/A" where the question is not appropriate to the project which is the subject of this application (the Project).
3. If an estimate is given as the answer to a question, put "est." after the figure or answer, which is estimated.
4. If more space is needed to answer any specific question, attach a separate sheet.
5. When completed, return one (1) hard copy of this application and one (1) electronic copy to the Agency/IDA at the address indicated on the application.
6. The Agency/IDA will not give final approval to the application until the it receives a completed environmental assessment form concerning the Project which is the subject of this application.
7. Please note that Article 6 of the Public Officers Law declares that all records in the possession of the Agency/IDA (with certain limited exceptions) are open to public inspection and copying. If the applicant feels that there are certain elements of the Project which are in the nature of trade secrets of information, the nature of which is such that if disclosed to the public or otherwise widely disseminated would cause substantial injury to the applicant's competitive position, the applicant may identify such elements in writing and request such elements be kept confidential in accordance with Article 6 of the Public Officers Law.
8. The Agency/IDA has established a non-refundable application fee of One Thousand (\$1,000) Dollars to cover the anticipated costs of processing this application. A check or money order payable to the Agency/IDA must accompany each application. **THIS APPLICATION WILL NOT BE ACCEPTED BY THE AGENCY/IDA UNLESS ACCOMPANIED BY THE APPLICATION FEE.**
9. The Agency/IDA has established a project fee for each project in which the Agency/IDA participates. **THIS PROJECT FEE is 1% of the total Project Cost. THE APPLICANT IS REQUIRED TO PAY THE AGENCY/IDA FIVE THOUSAND (\$5,000) DOLLARS OF THE PROJECT FEE WITHIN 7 DAYS OF THE APPROVAL OF THE PROJECT. PLEASE NOTE THIS FEE IS NON-REFUNDABLE. THE REMAINING BALANCE OF THE PROJECT FEE IS DUE AT TIME OF CLOSING.** Failure to close the Payment-in-Lieu of Taxes within six (6) months after approval will terminate the PILOT agreement. However, a six (6) month extension may be requested by the applicant, but must include an additional FIVE THOUSAND (\$5,000) non-refundable fee. Approval of the extension is at the discretion of The Agency's Executive Director. The additional FIVE THOUSAND (\$5,000) fee will be deducted from the Agency's Project Fee at the time of closing. The applicant will also be expected to pay to the Agency/IDA all actual costs incurred in connection with the application including all costs incurred by general counsel and bond counsel. 11. Chapter 59 of the Laws of 2013 (Part J), effective March 28, 2013 (the "2013 Budget Law"), established new record keeping, reporting, and recapture requirements for industrial development agencies that receive sales tax exemptions. The new law requires the following: 1) to keep records of the amount of sales tax benefits provided to each Project and make those records available to the State upon request; 2) that within 30 days after providing financial assistance to a Project, the Agency/IDA must report the amount of sales tax benefits intended to be provided to a Project; and 3) a requirement that the Agency/IDA post on the internet and make available without charge copies of its resolutions and Project agreements.
12. The 2013 Budget Law also requires that the Agency/IDA recapture State sales tax benefits where: 1) the Project is not entitled to receive those benefits; 2) the exemptions exceed the amount authorized or claimed for unauthorized property or services; or 3) the Project operator failed to use property or services in a manner required by its agreement with the Agency/IDA.
13. The Applicant requesting a sales tax exemption from the Agency/IDA must include in the application a realistic estimate of the value of the savings anticipated to be received by the applicant. **EACH APPLICANT IS HEREBY ADVISED TO PROVIDE REALISTIC SALES TAX ESTIMATES IN THE APPLICATION, as the 2013 Budget Law and the regulations expected to be enacted thereunder are expected to require that the Agency/IDA recapture any benefit that exceeds the amount listed in the application.**

APPENDIX A – ATTACHMENT TO APPLICATION FOR FINANCIAL ASSISTANCE

Local General Contractor, Subcontractor, Trades and Labor Policy

It is the goal of the The Agency/**IDA** to maximize the use of local labor for each project that receives benefits from the Agency/**IDA**. This policy applies to general contractors, subcontractors, trade professionals, and their employees. The Agency/**IDA**'s Local Labor Area consists of the following New York State counties: Broome, Chemung, Chenango, Cortland, Delaware, Otsego, Schuyler, Steuben, Tioga and Tompkins.

Every applicant is obligated to provide written proof and data (see attached ... forms) to the Agency/**IDA** as to the physical location of all the contractors who worked on the project.

The Agency/**IDA** will review the data provided and determine, on a case-by-case basis and in a fully-transparent manner, whether the Applicant has substantially conformed to the policy.

An Applicant **will not be deficient** if the proposed project requires specifically skilled labor that is unavailable in the Local Labor Area.

An Applicant **will not be deficient** if the proposed project utilizes parts and supplies assembled elsewhere because no such assembly is available in the Local Labor Area.

An Applicant **will be held non-compliant** with the Labor Policy if it imports labor from outside the Local Labor Area when equal labor that is ready, willing, cost-competitive, etc. resides in the Local Labor Area.

*The Agency/**IDA** may determine on a case-by-case basis to waive any portion of this policy for a project or a portion of a project where consideration of warranty issues, necessity of specialized skills, significant cost differentials between local and non-local services, documented lack of workers meeting the Local Labor Requirement or if other compelling circumstances exist.*

In consideration of the extension of financial assistance by the Agency/**IDA** American Horizons Group, LLC (the Applicant) understands the Local Labor Policy and agrees to submit either or both a Local Labor Utilization Report or a Non Local Labor Utilization Report at the time that construction ends on the project to the Agency.

The Applicant understands an Agency/**IDA** tax-exempt certificate is valid for one year from the effective date of the project inducement. If an Applicant wishes to request an extension, a letter must be sent 30 days prior to the end date to the Executive Director, on company letterhead, explaining the necessity for the extension.

The Applicant further understands any request for a waiver to this policy must be submitted in writing and approved by the Agency/**IDA** before a tax-exempt certificate is issued or extended.

The Applicant further understands that if the required forms are not submitted to the Agency/**IDA**, the Agency/**IDA** shall have the authority to immediately terminate any and all Financial Assistance being provided to the Project.

I agree to the conditions of this agreement and certify all information provided regarding the construction and employment activities for the Project as of 04/01/2021 (Submission date).

Broome County Innovation District Fiber Enhancement and Smart Cities Plan

Project Contact: Beth Lucas, Broome County Director of Planning
beth.lucas@broomecounty.us, (607)778-2375

Grant Overview

Broome County is submitting a grant through the federal ARC POWER program for development of the Broome County Innovation District Fiber Enhancement and Smart Cities Plan. The POWER (Partnerships for Opportunity and Workforce and Economic Revitalization) Initiative targets federal resources to support workforce and economic development activities in the communities and regions of Appalachia. The proposed project will include development of a study outlining expansion of the Southern Tier Network open access fiber broadband network and the potential for integration of smart cities components for the Broome County Innovation Districts and Opportunity Zones.

Project Cost

The ARC POWER program requires a 50% local match for overall project costs. There is a total cash cost of \$80,000 for development of the plan. We are requesting a total of \$50,000 from the ARC grant program. The remaining cash costs of \$30,000 will be contributed by Broome County and the Agency (\$15,000 each). An additional \$20,000 match will be provided in in-kind services from Broome County.

Project Description

The Innovation Districts were developed as part of the Southern Tier Upstate Revitalization Plan. These are areas in the downtowns of Binghamton, Johnson City and Endicott, targeted for investments to make them a destination for talent, new business development and partnerships, and to overall support an innovation economy. In addition, there is significant overlap with these areas and the federally designated Opportunity Zones, a program that provides tax benefits for investments made within these communities.

A significant priority of the Innovation Districts is investments in infrastructure that meet the needs of the modern economy and supports revitalization and private investment. Aging and dated infrastructure may make these areas less attractive and marketable, acting as a barrier to the types of investment we wish to see. Perhaps the most significant of those is reliable and resilient broadband infrastructure. A fiber network with adequate capacity and affordability can provide the backbone to economic development and improved quality of life. Reliable connectivity is also essential for limiting potentially costly operational interruptions.

Southern Tier Network is an open access, nonprofit broadband company with a limited local presence in these three downtowns, and other parts of the County. In an open-access model, a network is open to a range of service providers, including internet providers, enterprise-class services, cellular carriers and dedicated health care and education networks. This provides users with flexibility for their network, allows them to manage their network's security, design, and growth freely, and provides the ability to control and scale bandwidth needs, significant for keeping up with current and expected demand.

Through this planning process Broome County will work with the Agency and municipal partners to identify strategic facilities and development sites where access to this fiber network may enhance site marketability or provide opportunities for growth, expansion, or efficiency improvements of existing operations. For the fiber extensions identified, the plan will define the route and build-out design cost for implementing these system upgrades.

The study will also assess how expansion of the open-access fiber infrastructure can provide enhanced opportunities for integration of smart cities technologies within the Innovation Districts. The goal of smart cities is to use technology to improve the efficiency of services and meet the needs of residents and other stakeholders in a community. Using real-time control systems and sensors, data can be collected and utilized more efficiently, optimizing and, in some cases, automating community services. Smart cities investments play a large role in enhancing community competitiveness and attracting new residents and businesses. Smart cities integrate the technology needed to facilitate companies and industries to grow jobs, raise productivity, and drive prosperity. Some of the ways smart cities technologies may benefit local stakeholders are integration of smart building features for improved efficiency and productivity, opportunities for new tech and related businesses, more predictable, effective and user-friendly community services, and enhancing livability for the local workforce.

Broome County Industrial Development Agency

Solar and Energy Storage Projects PILOT Policy

DRAFT – Updated 4/14/21(DRAFT)

Purpose: The creation of an exemption policy for solar and energy storage projects located in Broome County, NY. The policy has been created to provide consistency in the approach to each of these projects in order to maximize the economic benefits for each taxing jurisdiction where such projects are located. The policy will be uniformly applicable to any solar or energy storage project located within the County of Broome.

Eligibility: Eligible projects must produce a minimum of ~~one (1)~~ megawatt of electricity. These include:

- Community distributed solar/shared solar
- Off-site generation projects that have a wholesale purchase power agreement with one (1) or more users
- Energy storage projects

Criteria: When a project owner seeks a payment in lieu of tax or PILOT Agreement from The Agency, the following requirements must be met for consideration:

1. Payment in lieu of taxes shall be established at \$~~106~~,000 per Megawatt. This amount could/would include total MW cost taking into account other benefits received, e.g. a Host Community Agreement or Road Use Agreement.
2. The term of the payment shall be no more than fifteen (15) years in length
3. Each year of the payment schedule will include a two (2) percent (%) escalator.
- ~~3-4.~~ A “Host Community Agreement” must be negotiated and approved by all relevant taxing jurisdictions, unless specifically waived by them. If an HCA is waived, a letter of endorsement from the host municipality is required.
- ~~4-5.~~ The project owner must provide proof that it has entered into a decommissioning fund or bond with the local municipality sufficient to remove the solar arrays at the end of the project without cost to the municipality.
- ~~5-6.~~ Compliance with the Agency’s local labor policy is required. *Prevailing wage rates will apply to all projects at or above 5 MW of energy production.
- ~~6-7.~~ It is a requirement strongly encouraged that the energy generated must be pre-offered or be given a preference to Broome County residents. If such term is proved to be impossible, some local benefit must be provided to satisfy a commensurate benefit, through the development of an HCA.

Fee Schedule: The Agency will assess a project development fee of 1% of the Total Project Costs. The company will reimburse The Agency for any expenses incurred for the use of subject matter experts.

Deviations to the Policy: Pursuant to NYS Real Property Tax Law (RPTL) Section 412-a, a project owner can propose terms deviating from this policy, however, the Agency has determined that it is in the best

interest of the taxpayers of Broome County that the uniform exemption policy be utilized as outlined herein.

Pursuant to the Agency's Uniform Tax Exemption Policy (UTEP), project owners could be eligible for applicable sales and mortgage tax exemptions, as outlined in our UTEP.

Unless specifically outlined in this policy, the project owner is responsible for complying with all other rules and regulations as outlined in the IDA's policies.

Notes:

Eligibility – It was recommended that we only provide benefit for projects that are above 1 MW. There is a project being sited in Broome County seeking benefits that is approximately 4MW. My recommendation is that find a number that is in alignment with median project size.

Criteria:

#1 – In speaking with multiple IDAs since our last meeting, I believe the per MW value should be at \$6,000, which is the high end of the range on these. This is the PILOT ONLY – HCAs would be negotiated outside of the development of the PILOT benefit. Projects throughout NYS are seeing increases in interconnection costs making the \$10,000 a likely unreachable figure.

#6 – Per recent NYS laws on prevailing wage – any project at or above 5 MW would be required to use prevailing wage rates.

#7 – It is my understanding that the only way to require that energy produced goes to a local user is in a situation where there is a pre-meter agreement. Need to research further. Other than that, like most energy production, it will go into the grid.

Prevailing Rate and Local Labor Policies

How will the two interact and what should
IDAs start to consider.

Presenters:

Jim Loewke – C.E.O. - Loewke Brill Consulting
Group – Rochester, NY

What is Prevailing Wage?

- In government contracting, a **prevailing wage** is defined as the hourly wage, usual benefits and overtime, paid to the majority of workers, laborers, and mechanics within a particular area. This is usually the union wage.
- Prevailing wages are established by regulatory agencies for each trade and occupation employed in the performance of public work, as well as by State Departments of Labor or their equivalents. (**Trade Specific**)

Under Section 224 of the Labor Law - Covered projects include:

- “Construction work” paid for in whole or in part out of “public funds”
- Aggregated to 30% of total construction project costs and \$5M.

- Examples:

\$10M Construction Project
\$3.0M in total benefits =
Covered Project

\$10M Construction Project
\$2.5M in total benefits =
Not Covered Project

(Construction Work) Paid for means:

- Paid directly (not subject to re-payment)
- All savings – PILOTS, sales tax, Employment taxes, Mortgage tax (all benefits)
- Money loaned subject to re-payment
- Credits against re-payment

The term “Public Funds” includes all “Public entities”:

- The state
- Local development corporation
- Municipal corporation
- Industrial Development Agency
- Any State, Local, Interstate or International Authority

Covered project does not include:

- Owners primary residence (less than 4 dwellings)
- “Established” not-for-profits
- Projects with a PLA.
- Multi residence and ancillary amenities
- Renewable energy system below 5 MW
- Construction work performed under FRESH program (supermarket retail)
- School under 60,000 sq ft.
- Historic rehabilitation

How is that different from Local Labor policies?

- Local Labor policies only guarantee workers from the area will be employed on the project.
- Labor rates to those workers are not regulated.
- Prevailing rate requirements, however, do not guarantee local labor will be employed.

Local Labor Policy guidelines:

- Typically, local means “touching counties”
 - Example – Monroe county local labor includes Livingston, Orleans, Genesee, Steuben, Yates, Ontario, Seneca, Wayne, Wyoming. All other counties in New York are considered “out of area”
 - Policies differ in local labor requirements: for example, Monroe – 100%, Orange County – 85%, Ulster County – 80%, Erie County – 90%
 - 3 typical exemptions –
 - 1. Warranty,
 - 2. price point differential (also policy specific)
 - 3. specialized construction, no contractor in area can perform.

How will Prevailing Rate interact with Local Labor:

- Workers can come from anywhere as long as they are paid “the Rate”
- Workers who would have previously been given a waiver (warranty workers or specialized construction) will still have to pay “The Rate”
- Price exemptions will not be allowed for significant lower estimates who do not bid using the required “Rate”
- The “Rate” is Trade Specific. The IDA will now have to determine the correct rate to apply to the above.

What are some overlaps between labor policies and prevailing rate:

- Since prevailing rate only applies to projects that meet the criteria, will local labor policies apply to the other projects?
- Should IDA's continue to enforce local labor policies on prevailing rate jobs? Is it fair to push that burden to the developer? Is it fair to the local work force that people from out of town take their jobs?
- How will IDA's determine rates for workers that would have previously been considered "exemptions?"

What is a Project Labor Agreement?

- The Prevailing Rate policy does not apply when a PLA is in effect.
- The PLA sets rates for all workers and designations. This puts the burden on the local unions to justify the correct rates.
- PLA's can be negotiated between public agencies and local building trades organizations. So local labor can be negotiated into the PLA.
- However, PLA's also guarantee labor will be union, so this will limit prospective bidders on the Project, even though the rates are the same.
- IDA's could look at a certain threshold to consider a PLA specific agreement. (\$10M? \$20M? Etc.)

Questions?

NYSEDC - INDUSTRIAL DEVELOPMENT AGENCY (IDA) ACADEMY

Below is a summary of certain New York State legislation affecting industrial development agencies:

A944 - Magnarelli

Title – AN ACT to amend the real property tax law, in relation to changes in assessment for businesses that make payments in lieu of taxes.

Summary: Many businesses have been enticed to areas through a development program known as PILOT (“payment in lieu of taxes”). PILOT exempts certain businesses from property taxes in exchange for payments to the county, towns, and school districts where they are located. Some PILOT agreements have provisions that allow the business to challenge property tax assessments and win a credit against future payments if found to be a valid challenge. A successful challenge would create a substantial reduction in revenue to a locality and school district that relies on PILOT payments. Localities and school districts should be given the courtesy of previous notice that the business is filing an assessment challenge. Notification would allow for planning and budgeting decisions to be made that would reflect a possible reduction in PILOT payments.

Comments:

- The notification must be given at least 30 days prior to the filing for a change in assessment
- Does 30 days provide enough cover to those affected local governments and school districts to adequately plan and make up for the reduction in PILOT payments?

S1769 - Skoufis

Title – AN ACT to amend the general municipal law, in relation to preventing certain elected officials from being a member of an agency; and to repeal subdivision 4 of section 856 of such law relating thereto.

Summary: The bill would prohibit any elected official serving at the county, town, city, or village level, from serving as member of the board of any IDA located within the county.

Comments:

- IDAs grant millions of dollars in financial assistance which take the form of tax incentives, PILOT agreements, and others
- Allowing local elected officials to serve on IDAs could open up opportunities for corruption and conflicts of interest

S235A - Mayer

Title – AN ACT to amend the general municipal law, in relation to allowing for the examination of industrial development agencies and not-for-profit corporations by county comptrollers.

Summary: Allows for independent examination and audit of IDAs and not-for-profit corporations on the local county level. Many of the actions IDAs take, like granting PILOTs, tax abatements, and terms of the incentives have big impacts on community members, workers, and taxpayers, yet are sometimes veiled from those affected. This legislation seeks to grant an additional level of accountability for IDA projects and actions.

Comments:

- Two auditing/oversight entities are enough

S977 - Gaughran

Title – AN ACT to amend the public authorities law and the not-for-profit corporation law, in relation to reviews by the authority budget office and granting the authorities budget office the authority to commence an action or special proceeding to annul the corporate existence or dissolve a corporation that has acted beyond its capacity or power or to restrain it from carrying on unauthorized activities.

Summary: Requires that a public authority publish a response to recommendations made by the Authorities Budget Office (“ABO”) in reports or letters within 30 days of receiving such recommendations. If the ABO makes recommendations for corrective action, the authority has 180 days to respond detailing the corrective actions taken, and if not, why the recommendations were not implemented. The legislation makes the knowing and willful submission of a false financial report to the ABO perjury in the third degree. Allows the ABO to remove authority board members that fail to complete state mandated training. Provides the ABO power to commence an action or proceeding to annul the corporate existence or dissolve a corporation that has acted beyond its capacity or power, or restrain it from carrying on unauthorized activities.

Comments:

- On the whole, this legislation increases the oversight powers of the ABO
- Seems a bit redundant, as the OSC already has authority to remove an entities tax exemption powers
- And the Attorney General has the authority to dissolve a corporation

Title – AN ACT to amend the general municipal law and the public authorities law, in relation to certain notifications regarding agreements requiring payments in lieu of taxes.

Summary: This legislation will require IDAs to notify a taxing jurisdiction within two years of the expiration of a payment in lieu of taxes agreement, or immediately upon the early termination of an agreement. Taxing jurisdictions often rely on PILOT agreements when calculating their budgets. A sudden termination or cessation of a PILOT agreement, without proper knowledge given to the taxing jurisdiction, can have negative effects on that taxing jurisdiction's budget. This legislation would ensure ample time is given to those taxing jurisdictions when a PILOT agreement is set to be terminated so as to plan accordingly.

Comments:

- What does "immediate" mean? How much time?
- Need a timeframe that is more specific

S1656 - Skoufis

Title – AN ACT to amend the general municipal law, in relation to prohibiting industrial development agencies from incentivizing movements within the state.

Summary: This legislation would tighten existing prohibitions on so-called "intra-state piracy" that restrict local IDAs from giving financial assistance to a company to lure it from one part of New York to another. The idea is that there is no net gain or benefit in moving jobs from one part of New York to another part of New York.

Comments:

- Would not allow for relocation projects to occur to allow a business to be more competitive
- There may very well be situations where a company would be more profitable and employ more New Yorkers if relocated to a different part of the state
- Does not address if a company is landlocked in their current footprint or a secondary location/expansion project

Title – AN ACT to amend the general municipal law, in relation to requiring the return of all or a part of the financial assistance provided for a project where the project has material shortfalls or material violations and preventing the use of funds, financial incentives, subsidies or tax exemptions for projects already in development.

Summary: This legislation would require that IDAs implement policies for the return of financial assistance or tax incentives provided to a project that is determined to show material shortfalls in job creation and retention or material violations of the project agreement. It also prohibits IDAs from offering financial assistance to projects that are already in development at the time of an application. Additionally, this bill requires the standard financial assistance application used by IDAs to require the disclosure of offers of financial assistance from out of state economic development corporations.

Comments:

- Prohibits incentives for projects “already in development”
- Bill does not define what “in development” means

IDA ACADEMY – PENDING LEGISLATION UPDATE
April 13, 2021

Below is a summary of certain New York State legislation affecting industrial development agencies:

**S1655 -
Skoufis**

Title: AN ACT to amend the General Municipal Law ("GML"), in relation to preventing the use of funds, financial incentives, subsidies or tax exemptions for projects occupants which are not public.

Summary: Amends Sections 862 and 875 of the GML to provide that:

No funds, financial incentives or subsidies of the agency shall be used in respect to any project in which the project occupant as defined in section eighteen hundred one of the public authorities law is not publicly disclosed at the time of the public hearing for the project.

AND

No tax exemptions shall be granted to any project if the project occupant as defined in section eighteen hundred one of the public authorities law is not publicly disclosed at the time of the public hearing for the project.

"Project occupant" shall mean the business enterprise which proposes to use a project after construction, acquisition, rehabilitation or improvement.

Comments:

- Currently sufficient to identify the project owner, operator or manager.
- This would hinder ability to create mixed use or other commercial projects as many times the commercial space is not leased up at time of closing.

**S4610 -

Title: AN ACT to amend the Public Authorities Law ("PAL") in relation to disposals and contracts for disposal of property.

Summary: Adds (g) to 2897(6) of PAL to require any right of first refusal in a contract for the disposition of property require that the property be transferred at or above FMV at the time the right is exercised.

Amends (v) and (vi) of 2897(6) (c) and Subdivision (7) of 2897 of the PAL to restrict instances in which you can dispose of property by negotiation and for less than FMV by eliminating a transfer within the mission or purpose of an IDA.

**Comments:**

- As currently in effect, the PAL allows IDAs to dispose of property by negotiation (an exception to public advertising/bidding) if, among other reasons, it is in furtherance of the IDA's purpose or mission (as currently set forth 2897(7)) or if otherwise authorized by law.
- Proposed legislation amends 2897 (7) to remove a transfer within the mission or purpose of an IDA and replaces it with a transfer *in the public interest*.
- Proposed legislation further amends 2897 (7) to require the IDA to seek approval of the Governor, the speaker of the assembly and the temporary president of the senate for a transfer determined by the IDA to be *in the public interest*.

**S4611 -
Comrie**

Title: AN ACT to amend the Public Authorities Law in relation to requirements for explanatory statements regarding disposals of property.

Summary: Adds (iii) to 2897(6)(d) to provide that each explanatory statement required in connection with a disposal of property by negotiation shall include the names of all beneficial owners of the entity to which the property is being transferred. Such information shall also be provided to all board members.

"beneficial owner" shall mean an individual who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, owns any equity interest of an entity, and/or has a level of control over the funds or assets of the entity that, as a practical matter, enables the individual, directly or indirectly, to control, manage or direct the entity and the use of its funds and assets or any part thereof.

Comments:

- Definition of "beneficial owner" is very broad.
- Determining whether a person is within the definition of "beneficial owner" is burdensome given the scope of the definition.
- What proof does the IDA need to obtain to determine who has a beneficial interest?

S6055 - Skoufis

Title: AN ACT to amend the General Municipal Law, in relation to allowing industrial development agencies to make grants to municipalities for open space preservation, parkland improvements and conservation easements.

Summary: Amends Section 858 of the GML to authorize IDAs to make grants to the municipality for whose benefit the agency was created for the purposes of space preservation, parkland improvements and conservations easements, provided the municipality determines such grant will encourage tourism or otherwise improves quality of life.

Comments:

- Uncertain of the need for this legislation.
- It would make sense to expand the ability of IDAs to provide grants for additional economic development reasons/goals in general.

S5146 - Hinchey

Title: AN ACT to amend the General Municipal Law, in relation to prerequisites for financial assistance provided by industrial development agencies.

Summary: Amends Section 859-a (4) of the GML to require an IDA, prior to providing any financial assistance of more than one hundred thousand dollars, to estimate, to the extent practicable, the percentage of materials, products, goods and other items to be used on, by or for the proposed project which are *produced, manufactured or otherwise generated* in the state.

Amends Section 859-a (5)(b) of the GML to require that the cost benefit analysis identify the extent to which jobs created or retained shall be filled by residents of the economic development region as established pursuant to section 230 of the Economic Development Law or the labor market area as defined by the IDA, in which the project is located; and the extent to which a project will use materials, products, goods and other items which are produced, manufactured or otherwise generated in the state.

Amends Section 859-a (6)(b) to require, as part of the annual reporting, the project developer to provide the percentage of materials, products, goods and other items purchased as a result of the financial assistance which were produced, manufactured or otherwise generated in the state.

Comments:

- The # of FTE jobs to be created/retained from the designated labor market area is already required as part of the uniform application (Section 859-a (f)) – this proposed legislation would require the IDA to use that information as part of their cost/benefit analysis if they are not already doing so.
- How will the IDA estimate or determine (or cause the developer to estimate or determine) the goods/materials/products which are *produced, manufactured or otherwise generated* in the state.

- How would an IDA deal with change orders or unavailability of materials during construction.
- The requirement seems overly burdensome and difficult to determine and enforce.
- Seems beyond purview of an IDA performing economic development within its municipal jurisdiction.
